

SABER MAGNET

Cooling coil purification
UV object sterilization system

The 24V 16" Ultraviolet Lamp System is designed to bask the evaporator coil with UVC Germicidal Energy, preventing and destroying mold, biological odors and other microbial contaminants. A coil with bio-film (a coating of microbial growth) acts as an adhesive, attracting dirt and coating the fins of the coil. This typically results in an odor emanating from the equipment and a loss in energy efficiency as the equipment must work harder to provide the same air temperature.

Low voltage 24VAC ballast w/ Lamp and Ballast Monitoring Electronics

Magnetic Multi-Bracket for various applications

SABER 16/24-GM2 FEATURES

- UVC Germicidal Coil Cleaner destroys mold & their associated odors on the coil
- Improve energy efficiency
- Status LED on ballast
- 16 inches UVC T5 lamp
- Magnetic bracket or duct installed
- Optional step down transformer (120v to 24v)
- ETL certified
